

SILKWOOD SOFTWARE

Warranty Disclaimer and License Agreement

1. Disclaimer and Limitation of Liability

Where 'Silkwood Software' is referred to in this section the words shall be taken to collectively include Silkwood Software Pty Ltd and any affiliates, associates, principals, employees or other related parties.

To the extent not prohibited by law: This software and documentation is supplied to you 'as-is' and without any warranty whatsoever. Silkwood Software does not warrant the performance of this product in any way. Silkwood Software disclaims and makes no representations as to, including without limitation, the fitness or suitability of this product for any particular purpose, merchantability, or non-infringement of third party rights.

2. License Agreement

This software is distributed under two different license terms and conditions: General License and Commercial License.

2a. Common Terms and Conditions

This software is licensed, not sold.

Subject to the terms of this agreement, including the applicable license terms under Section 2b or 2c, Silkwood Software grants you a non-exclusive license to use this software and related documentation.

You may not:

- sell, rent, lease, commercially bundle, or sublicense this software;
- decompile, modify, translate, reverse engineer, disassemble or create derivative works based upon this software or documentation associated with the software;
- remove this notice or any other proprietary notice from the software or documentation;
- give permission to any other individual or party to use the software other than under the terms of this agreement;
- use this product for any purpose whereby the failure of the software could lead to death, physical injury or environmental damage.

You expressly acknowledge and agree that the use of this software is solely at your risk and, where used in such a context, the risk of your business, organisation or employer.

You may make as many copies as you wish. You may redistribute or make any copies available to others, with the following restrictions: The right to make or distribute copies does not confer the right to install or run the software. The right to install or run the software is governed by selecting one of the two available license options. If you redistribute this software you shall not charge for such redistribution. If this copy is an alpha or beta release you may only redistribute or make copies available to others if you have written permission from Silkwood Software to do so.

2b General License

In addition to the conditions of Section 2a, use of this software under a General License is subject to tag number limit restrictions.

2c Commercial License

In addition to the conditions of Section 2a, use of this software under a Commercial License is subject to the following restrictions.

Commercial licenses are sold on a 'per seat' basis. Each license permits use of the software by one person at one time. By using this software the licensee agrees to ensure that this restriction is complied with.

A commercial license entitles the licensee to all future releases under the major release number current at the time of purchase, where the major release number is designated by the first digit of the version number triplet.

Prior to purchasing a commercial license any party may evaluate the product for an unlimited period of time under the conditions of the general license.

A commercial license allows an unrestricted number of tags to be used.

LEGAL ISSUES

In plain English:

1. We don't promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don't have to pay us.
3. You may not pretend that you wrote this software. If you use it in a program, you must acknowledge somewhere in your documentation that you've used the IJG code.

In legalese:

The authors make NO WARRANTY or representation, either express or implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.

This software is copyright (C) 1991-1998, Thomas G. Lane.
All Rights Reserved except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to these conditions:

(1) If any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered; and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.

(2) If only executable code is distributed, then the accompanying documentation must state that "this software is based in part on the work of the Independent JPEG Group".

(3) Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept

NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the IJG code, not just to the unmodified library. If you use our work, you ought to acknowledge us.

Permission is NOT granted for the use of any IJG author's name or company name in advertising or publicity relating to this software or products derived from

it. This software may be referred to only as "the Independent JPEG Group's software".

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

ansi2knr.c is included in this distribution by permission of L. Peter Deutsch, sole proprietor of its copyright holder, Aladdin Enterprises of Menlo Park, CA. ansi2knr.c is NOT covered by the above copyright and conditions, but instead by the usual distribution terms of the Free Software Foundation; principally, that you must include source code if you redistribute it. (See the file ansi2knr.c for full details.) However, since ansi2knr.c is not needed as part of any program generated from the IJG code, this does not limit you more than the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf. It is copyright by the Free Software Foundation but is freely distributable.

The same holds for its supporting scripts (config.guess, config.sub, ltconfig, ltmain.sh). Another support script, install-sh, is copyright by M.I.T. but is also freely distributable.

It appears that the arithmetic coding option of the JPEG spec is covered by patents owned by IBM, AT&T, and Mitsubishi. Hence arithmetic coding cannot legally be used without obtaining one or more licenses. For this reason, support for arithmetic coding has been removed from the free JPEG software. (Since arithmetic coding provides only a marginal gain over the unpatented Huffman mode, it is unlikely that very many implementations will support it.) So far as we are aware, there are no patent restrictions on the remaining

code.

The IJG distribution formerly included code to read and write GIF files. To avoid entanglement with the Unisys LZW patent, GIF reading support has been removed altogether, and the GIF writer has been simplified to produce "uncompressed GIFs". This technique does not use the LZW algorithm; the resulting GIF files are larger than usual, but are readable by all standard GIF decoders.

We are required to state that

"The Graphics Interchange Format(c) is the Copyright property of CompuServe Incorporated. GIF(sm) is a Service Mark property of CompuServe Incorporated."

Use and Copyright

Silicon Graphics has seen fit to allow us to give this work away. It is free. There is no support or guarantee of any sort as to its operations, correctness, or whatever. If you do anything useful with all or parts of it you need to honor the copyright notices. I would also be interested in knowing about it and, hopefully, be acknowledged.

The legal way of saying that is:

Copyright (c) 1988-1997 Sam Leffler
Copyright (c) 1991-1997 Silicon Graphics, Inc.

Permission to use, copy, modify, distribute, and sell this software and its documentation for any purpose is hereby granted without fee, provided that (i) the above copyright notices and this permission notice appear in all copies of the software and related documentation, and (ii) the names of Sam Leffler and Silicon Graphics may not be used in any advertising or publicity relating to the software without the specific, prior written permission of Sam Leffler and Silicon Graphics.

THE SOFTWARE IS PROVIDED "AS-IS" AND WITHOUT WARRANTY OF ANY KIND, EXPRESS, IMPLIED OR OTHERWISE, INCLUDING WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

IN NO EVENT SHALL SAM LEFFLER OR SILICON GRAPHICS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES OF ANY KIND, OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER OR NOT ADVISED OF THE POSSIBILITY OF DAMAGE, AND ON ANY THEORY OF LIABILITY, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.
